*Embroidery has been dated to the Warring States period (5th-3rd century BC). The process used to tailor, patch, mend and reinforce cloth fostered the development of sewing techniques, and the decorative possibilities of sewing led to the art of embroidery. In a garment from Migration period Sweden, roughly 300–700 CE, the edges of bands of trimming are reinforced with running stitch, back stitch, stem stitch, tailor's button-hole stitch, and whipstitching, but it is uncertain whether this work simply reinforced the seams or should be interpreted as decorative embroidery.*
